Your reliable R&D partner for innovative mechatronic solutions

Linz Center of Mechatronics GmbH (LCM) is your experienced partner for innovative mechatronic solutions. For over 20 years, we have been supporting companies with tailor-made technologies that enhance competitiveness and accelerate innovation processes.

Our portfolio includes mechatronic systems, electric and hydraulic drive technology, electronics, industrial IoT, and model-based simulation and optimization. Through interdisciplinary approaches and collaborations with AVL, BMW, Siemens Energy, and other industry partners, we advance cutting-edge technologies.

Our research, grounded in science, delivers sustainable, practical solutions that increase efficiency and set new standards. The **EARTO Award "Impact Delivered"** recognizes our contribution to industrial innovation. Together, we are shaping a sustainable future.
